

Tellabs® Program and Project Management Services

Keep your network implementation running on time and on budget with Tellabs Program and Project Management Services

Overview

No matter how well a network implementation is conceived, staffed, and financed, you run significant risks of meeting the schedule, falling short on quality and exceeding budget if all aspects of the program are not expertly integrated and managed.

The Tellabs program management team is dedicated to ensuring all projects related to your implementation run smoothly and in a timely manner. A Tellabs program manager serves as the focal point for any project, issue or question — expertly resolving conflicts and identifying issues before they become problems. A program manager facilitates regular meetings between your team and the Tellabs team to ensure seamless communications throughout the project. With a Tellabs expert as a single point of contact to drive implementation from the planning stage through project completion, you can be sure that network implementation will be done in a timely manner with high standards of quality and cost-effectiveness.

Tellabs Program and Project Management Services offer a wide variety of deliverables including:

- Comprehensive project plans
- Documentation of program requirements and deliverables
- Program and project schedules, milestone definition and tracking
- Planning and management of resources, risks and costs
- Scheduling and participation in regular status meetings
- Coordination of all Tellabs and third-party resources and personnel
- Ensuring smooth transition of change and issue management processes
- Regular updates with detailed reporting on the status of all activities, exception reporting, and meeting minutes
- Post program/project review
- Other customized deliverables as required

Tellabs program management professionals remain focused on bottom-line results as they drive project implementation from planning to completion.

Our team is focused on directly impacting your bottom line results:

- *Minimize project costs* — Reduce budget overruns and scheduled delays through streamlined project planning, tracking and reporting with strict adherence to timelines and milestone achievement
- *Improve time-to-market* — Proactively identify potential issues before they can effect the schedule and keeping all project activities on track
- *Accelerate return-on-investment* — Ensure that documented project objectives are met quickly and efficiently
- *Reduce risks* — Leverage Tellabs' proven best-practice project management and risk mitigation methodologies

Making Your Vision a Reality

Tellabs' program and project management team has years of experience in managing projects from small, single-system deployments to large-scale implementations of brand-new networks across broad geographies. Our program managers utilize proven processes and tools that combine with their extensive experience to help implement your solution quickly and efficiently.

From design and deployment to ensuring that your network runs at optimal efficiency, Tellabs seamlessly manages your implementation and ensures that your program objectives are met.

Tellabs' proven track record of project-managing carrier-class network implementations and superior customer focus is the first step to ensuring that your vision becomes reality.
